## AVPro Edge 4K Four Input Multiviewer AC-MV-41

### FRONT

### BACK

Experience seamless audio and video integration with the AVPro Edge 4K Four Input Multiviewer AC-MV-41. This advanced processor effortlessly consolidates up to four HDMI signals into a single, customizable display. Tailor your visuals with ease using intuitive control interfaces or simple API calls, enabling the creation of personalized layouts or presets. With individual HDMI loop outs and extracted audio ports for each input block, this versatile unit seamlessly integrates into larger distribution systems, such as matrix switching or AV over IP setups, amplifying its utility beyond standalone processing.

- Harness the power of four 18Gbps HDMI 2.0 inputs for high-definition connectivity.
- Craft and effortlessly recall custom presets to streamline your workflow.
- Seamlessly integrate with leading control systems like Crestron for enhanced operational efficiency.
- Flexible control options including RS-232 or LAN for convenient management.
- Easily switch between displaying 1, 2, 3, or 4 sources on the screen to adapt to various presentation needs.
- Unleash limitless creativity with customizable layouts tailored to your or your client's preferences.
