

### Unlimited sources, displays, USB devices & video walls

MXnet is the AV over IP video distribution ecosystem from AVPro Edge. MXnet is focused on three things, stability of the entire system, interoperability with any HDMI source, display, USB device, or control system, and easy deployment of the entire system. MXnet allows for unlimited sources, displays, USB devices & video walls.

### Matrix Switches

AVPro Edge specializes in high speed 18Gbps signals with HDR, and the matrix switches are no exception.

### HDMI Extenders

With so many extenders ranging from short to long distances, transferring signals over fiber optic or category cables – there is an extender option for every installation.
