

DISCOMFORT IS A PROBLEM

Current HVAC systems do not provide room by room comfort control. Differences can be greater than 10 degrees in the same zone! Even worse, zoning costs thousands of dollars to install and takes days or weeks to complete properly. It's no wonder why most homeowners do not have zoning.

HIBERSENSE IS THE ANSWER

Personalized room by room climate control because a home should feel like a home, no matter what room you're in.

Comfort

HiberSense uses predictive analytics to efficiently and safely heat and cool each room to their ideal temperature.

Pays For Itself

With dynamic ventilation, HiberSense can save up to 40% on heating and cooling while preventing costly repairs.

Easy Retrofit

HiberSense has a simple installation that can be outfitted to any home with forced air in just one afternoon.

Comfort for Everyone

HiberSense empowers homeowners with a well designed and adaptable system that provides HVAC automation and control for every individual room. Our patent pending, easy retrofit system uses predictive analytics, wireless sensors, and smart vents to heat or cool every space without unnecessarily conditioning unoccupied spaces.

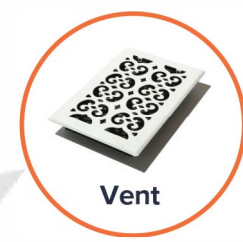

Hibersense

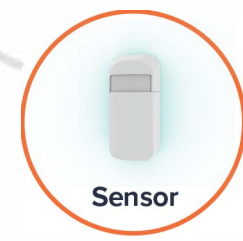

Mobile app that lets users set their preference and view system usage

Analyzes data & user preferences to intelligently control smart vents and the HVAC unit.

Wireless vents control airflow to every room and track temperature, humidity, and pressure to monitor HVAC system performance.

Wireless sensors capture important data about a room like temp, humidity, occupancy, and indoor air quality.

PRO ONLY

HiberSense Smart Climate Control is available exclusively through professional distribution and installation.

OUR MISSION

We are dedicated to providing the best possible HiberSense experience for our partners, customers, and users.

BECOME A PRO
