

Already using WAVE? Make room for Lowell.

01

AMERICAN-MADE RACK FAMILIES

LXR, LER, LGR and LWR racks are made in the USA using USA-certified steel.

02

OPTIONS FOR YOUR PROJECTS

Choose compact, enclosed, side-by-side or wall-mount rack formats to suit the job.

03

BUILD THE WHOLE SYSTEM

Source racks, cable management, power and connectivity through Future Ready Solutions.

WAVE VS LOWELL

Start with the rack type you already know - then compare the Lowell family that fits the job.

YOUR PROJECT	RACK FROM WAVE		CONSIDER LOWELL
Open-frame skeleton rack	SK Series 8U / 14U / 28U / 38U	➤	LXR Series 8U / 14U / 22U / 30U
Preconfigured enclosed floor rack	RCS Series 18U / 27U / 35U / 42U	➤	LCDR Series 18U / 27U / 35U / 42U
Swing-open wall rack	ERW Series 6U / 9U / 15U	➤	LWR Series 7U to 35U

Application starting points—not one-for-one replacements. SK models also support wall mounting; LXR is shown for floor use. Match size, depth, load, access and included items.

What to check before you switch:

Equipment fit

Confirm usable depth, equipment weight, airflow and rear access.

Accessories

Review any Forward or Lever Lock requirements. Specialty parts may not transfer.

Complete cost

Compare the rack, accessories, freight and installation – not just the frame.
